# INSTALLATION

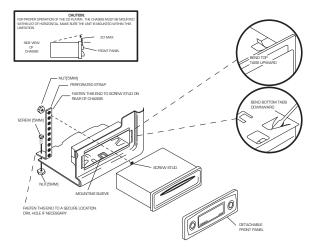

#### HEADUNIT INSTALLATION

Before installing the unit, please remove the two transit screws.

Note: When installing this unit on a vessel, you must use the two pieces of plastic film[30mm  $\times$  20mm] supplied with the unit to seal the two holes after removing the screws, this will ensure the unit remains water resistant.

### Mounting Hole Dimensions 178mmW x 178mmD x 50mmH

Insert the sleeve into the mounting hole and select the appropriate tabs to secure it firmly by bending them into position.

Use the supplied strap to support the rear of the unit.

Version 1.0

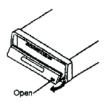

### REMOVING THE UNIT

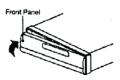

- Press the open button on the face plate Insert the supplied keys into the grooves in the housing until they click (as shown) 2. Insert the supplied keys into the grooves in the housing until they click
  3. Pull the levers towards you and slowly remove the unit from the cage.

# DETACHING FRONT PANEL

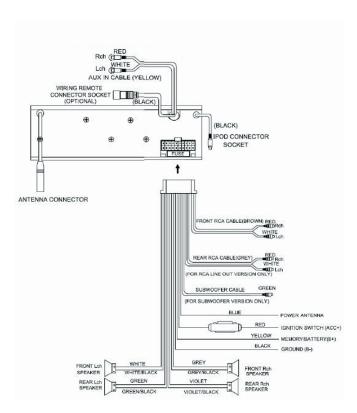

- To detach the front panel press the open button
   Then press the release button on the front underside edge and slide the face toward you. 2. Then press the release button on the front underside days and close 3. A protective case is supplied to store your removeable front panel in.

### REATTACHING FRONT PANEL

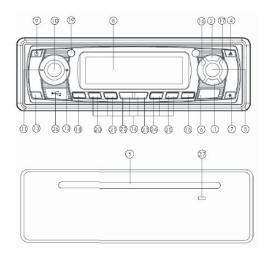

- If the panel bracket is in the open position slide the panel back on into position.
- If the panel bracket is in the upright position clip one end in firstly and then clip the other end in and the panel will lock in place.
