- Storing temperate: -10 -60

Control

Charging the Bluetooth Car Kit

The Bluetooth handsfree car kit is powered by a rechargeable Li-ion battery.

The rechargeable Li-ion battery can be recharged for hundreds of times, till it wears out.

The Car Kit be “Do..Do” alarm sound when the battery is running low. And “Low Batt” on the LCM will confirm it. Please charge it with the enclosed charger.

1. Plug the charger to the DC 5V port.
2. Plug the other port of the charger to the 12V car cigarette lighter.
3. Read Led will indicate that the device is charging.
4. “Red LED is off” means the battery is full.

Getting Started

Your Bluetooth Car Kit is equipped with the following buttons and functions as shown in the controls section of this manual.

ON/OF SWITCH: Turn the device on, the screen will light up and show “BLUETOOTH”, at

the sametime you will hear a start-up tone “Do”; turn the device off to conserve battery power when not in use

“+” This button can scroll the last 10 incoming call numbers.

“-“ This button can scroll numbers in phone book.

“☎” This button performs the following functions: answer a call, reject a call, end a call, voice dial, redial the last number, and call waiting, (specific descriptions as the following operating instructions)

MICROPHONE: The Bluetooth Car Kits is equipped with full duplex system microphone, DSP technology, noise and echo suppression system.

SCREEN: The screen supports up to 12 digits, displays both the English name and device status messages.

Pairing Your Bluetooth Car Kit

Prior to using your Bluetooth Car Kit for the first time, you must pair it with a Bluetooth enabled cell phone. The pairing procedure is different between models of cell phones. Please refer to the user manual of your cell phone for specific details on Bluetooth connectivity.

Turn on the Bluetooth Car Kit, and in “Stand-by” mode.

Activate your cell phone’s Bluetooth function.

Refer to the cell phone’s User Guide for instructions on Bluetooth.

1. Select “HF30” from the list on the cell phone Paired device.
2. Enter the Passcode “0000” to confirm the pairing process.
3. Pairing is now complete, and the Blue LED will be lit, meanwhile “Paired” and “Connected” will confirm it.

NOTE: If the cell phone’s and/or the Bluetooth Car Kit’s Battery is weak, you may lose the Bluetooth connection. Maintain the charge of the battery to ensure good bluetooth connectivity.
