GPS Tracking Device

Product Overview

Thank you for purchasing portable GPS tracker.It's for monitoring and protecting people and property with built-in U-blox GPS and GSM/GPRS technology.It also with strong magnet in the rear and 8000mA backup battery.

Accessories:

1X Device
1X USB charge cable
1X User Guide
1X Guarantee Card

Hardware Specification:

Content	Specs.
Mainframe Dimension	104*56.5*24mm
Net weight	195g
GSM frequencies	850/900/1800/1900Mhz
GPRS	Class12,TCP/IP
GPS chip	UBLOX G7020
Voltage range	3.6-4.2VDC
Standby Current	≤2mAh
GPS locating time	cold start=38s warm start=32s hot start=2s
GPS Accuracy	≤ 10m
GPS sensitivity	-159DB
Work environment temperature	-40℃+80℃
Work environment humidity	20%-80%RH
Battery	Chargeable 3.7v 8000mAh

SIM Card Installation

The SIM card is not included in the package. Any SIM card which support GSM 2G can work and be available from the user's local operator.

Note: Before installing the SIM card, please check if the SIM card has PIN code or not, if yes, please use a cell-phone to unlock the card's PIN code. And make sure it's activated with credits.

Device Charging

For the first time use, please fully charge the battery for around 2-3 hours with the USB charger.

Turn on the device by Inserting Card

Please insert the SIM card in the right direction. You will see the indicator light sparkles, then turn off. That means the SIM card inserted successfully.

After normal turn-on, the platform will upload position in 10 minutes and you can log on the website for checking.

Configuration and Operation by SMS

1. To Set the Authorized Number

Command: CENTER,000000,phone number#

NOTE: The letters or symbols should be English and the letters should be in capital.

Example: CENTER,000000,123456789#

※ Using your mobile phone, send the above command to the phone number of the device, it will reply: Center OK!

※ To delete this number, you can send :CENTER,000000,0# to the phone number of the device.

2. GPRS Setting

In order to use the GPRS function, the user needs to setup the APN by sending SMS command.

--what is APN? Access Point name (APN) is the name used to identify a general packet radio service (GPRS) bearer service in the GSM mobile network. The APN defines the type of service that is provided in the packet data connection.

※ Make sure that the SIM card in the tracker supports the GPRS function.

※ The APN can be acquired from your local GSM operators.

Command: APN,APN information,user name,password#

Note: Some APN without user name and password, so please leave it blank.

For example: APN,internet,123,456# (with the user name and password)
APN,internet# (without the user name and password)

- ※ please set it up when the device can not connect with the web platform or the APP.
- ※After sending the command,it will reply:APN OK!

3.Set up the SMS Language

Command:LANG,0# (English)
LANG,1# (Chinese)

- ※The default language is Chinese.
- ※This is to set up the language of SMS reply content.
- ※after sending the command,it will reply:LANG OK!

4.Location request

4.1 Reply with coordinates and web link

Command:URL#

The device will reply:the IMEI No,the date,the time,the map link,the longitude and latitude

Example:3568xxxxxxx2219<01-03 14:59:43>

<http://maps.google.com/maps?q=N22.669534,E114.011888>

- ※Put the coordinates to Google earth or Google maps,click on search button,then you will find the position.
- ※Click on the link then the location can be shown directly on Google Map on your mobile phone.

5.Vibration Alarm

Command: VA,ON# (turn on this function)
VA,OFF# (turn off this function)

- ※This function is off by default setting.
- ※After sending the command,it will reply:VA OK!

6.Over-Speed Alert

Command: OS,80# (80 is the set-up speed)
OS,OFF# (turn off this function)

- ※this is to turn on/off the over-speed alarm,speed unit:km/h
- ※speed range:30-180km
- ※this function is off by default setting.
- ※after sending the command,it will reply:OS OK!

7.Listen-in (Voice Monitoring)

Command:JT#

※after sending the command,it will reply:JT OK!

※The tracker will call the center number automatically after the SMS reply,then please answer the call to hear what is happening around the tracker.

8.Checking Settings

Command:ST#

※The device will reply:

IMEI: 888xxxxxxxx888

MC: 1(Alarm mode)

VA: 0 (Vibration alarm on/ff)

OS: 0 (Over speed alarm on/off)

LA: 0 (Light perception alarm on/off)

HBT: 10 (Heartbeat packet time)

LANG: 1 (language)

GMT: E8 (time zone)

Command:#TCP#

※ The device will reply : IMEI NO./WEBSITE:PORT NO./APN##/NETWORK
STATUS/SIGNAL#POWER

Example:353506810007721/www.b.gps903.net:7700/cmnet##/SOC4/165:30#100

9.Reboot device

Command:RESET#

※The device will restart itself without changing any settings.

10.Initialization

Command:RFS#

※This is to make all settings back to the factory default,except the IP.

※Only the center number has the right to operate.

※please caution to use.

11.Working Modes

Command:WKMD,2# (super-long standby mode)

WKMD,1# (power-saving mode)

WKMD,0# (safe mode)

※ the default mode is safe mode.

※ **Super-long standby mode:**The platform only work when you send a SMS command to get the location,this is the most power-saving.

※**Power-saving mode**:The platform only upload LBS location and the location precise varies according to the cities where it is located . It is purely power-saving.

※**Safe mode**:The platform will upload GPS location with high precision in real time. But it is very power-consuming.

12.Set up data upload time interval

Command:WKMD,0#20#

※WKMD,0# represents the safe mode

※time can be from 20s to 120s. The time must be a multiple of 10.

※the default is 20s

※after sending the command,it will reply:WKMD,0:OK!

How to Connect Device to the Platform for real time tracking via GPRS

Check through PC

Web Platform : www.gps903.net (International)

Account: Device IMEI (at the back of the device cover)

Original passwords: 123456

Operations of APP in a Cellular Phone

APP NAME: GPSONE

※please search it in the IOS app store or Google play store or scan the QR code from the web platform

※please login the app as following:

The remaining battery (FYR)

More functions are available after log-in

Click Live to get the device's location

Click to get the device's location

Click to get the cellular phone's location

Note: Only when there is a certain distance between the phone and the GPS device, the location will show up respectively.

Geo Fence

An electronic fence can be set up after log-in APP or PC. When the device comes out or in the fence after the set-up is done, it will automatically pop-up warning window.
