QT548-841-5

8-QSM6006B Cameras

1- QT548 DVR w/ 500GB HD

Product Overview

- Q-See does it again with its new 8 Channel DVR with 8 high-resolution cameras.
- This Costco-exclusive system has everything you need to watch over your loved ones and protect your property. The 8 weatherproof bullet cameras give you flexibility for placement almost anywhere. Connect the DVR to a 19″ or larger HDMI or VGA ready monitor or a television to view all the video feeds simultaneously, individually or a few at a time.
- The pre-installed AV Rated SATA 500GB hard drive can retain hours or days of video. The DVR will support a drive up to 2 terabytes to expand your storage, and depending on your preferences, the system can be set to record only when motion is detected, eliminating the need to sift through hours of footage to find a specific event. You can also easily save any important video to a removable USB drive for storage or playback on a computer.
- In addition to being able to control and monitor your system on-site, the QT548 DVR can be accessed remotely, whether over the Internet or on any of the supported mobile devices including the iPhone, iPad, Android, Windows phone 7 and BlackBerry devices. You can also receive e-mail alerts notifying you of detected events. Log into your system via Q-See mobile apps on your WiFi, 3 or 4G network or computer to check in on your family or employees.
  You can also save critical events onto your computer for added security.
- Our online knowledge base is ready to help you 24/7 and our tech support staff is available to help you online or over the phone Monday through Friday 8:30am to 5pm Pacific Coast time.

Main Features

S/N Ratio - >48dB

Power Consumption - <6 Watts (LEDs on)

Power Supply – 12v/600mA

Operating Temperature - 14 to 122°F 95% Humidity

Cable – 60feet Video/Power

FAQ

Question: I am not getting any audio from my cameras, Why?

Answer: The cameras that come with the package do not have built in microphones. If you want to hear audio from the camera you would need to run a powered microphone from the camera location and connect it to an audio in port on the back of the DVR. You will also need to connect an amplified speak to the audio out port on the DVR to hear the audio on the DVR.

Question: I can see the video on my screen but the mouse, remote, and buttons on the front of the DVR do not work, how can I access the menu?

Answer: Hold down the stop/escape button on the front of the DVR for around 10 seconds until you hear a beep and see if this gets the mouse, remote and buttons to work.

Question: The video on my QM6006B camera is very dark, how can I correct this?

Answer: Put your hand over the front of the camera for around 10 seconds, then remove your hand, you should hear a click and the filter on the camera should reset.
