## The Access Keypad

The Keypad provides four separate functions:

- Local audible and visual alarms
- Bypass function to escort residents through the protected exit
- Alarm reset when the Controller is in continuous alarm mode or resets the bypass sequence
- Controller status indication via the LED indicators

The Controller may be bypassed or reset at an exit point by entering a 3- to 7-digit code at the keypad.

Status Indicator	Condition	Cause	Action
Power	OFF	Power is off	Turn Power ON
	Solid Yellow	Power ON, Ready Mode	None; system ready
Bypass	Flashing Green/Red + Beeping tone	Bypass Mode	Escort resident immediately
Alarm	Flashing Red + Beeping tone	Alarm Mode	Investigate; reset alarm

Escorting Residents (Bypass)

1. Bring the resident to the exit, ensuring that he or she is not in the detection zone.

2. Enter the <BYPASS CODE> on the keypad.

3. Press <#> on the keypad.

4. Escort the resident through the exit.

Note: There are three automatic timers enabled by the system when the bypass function is activated:

- **Bypass Timeout:** You have 10 seconds to enter the detection zone after the bypass code is entered. If no tag enters the zone within the 10-second period, the bypass is terminated.
- **Transport:** Once the tag enters the detection zone, you have 90 seconds to transport the resident through the zone before the alarm is activated.
- **Rearm:** After the tag is through the zone or the door closes, the system automatically resets itself in 8 seconds.
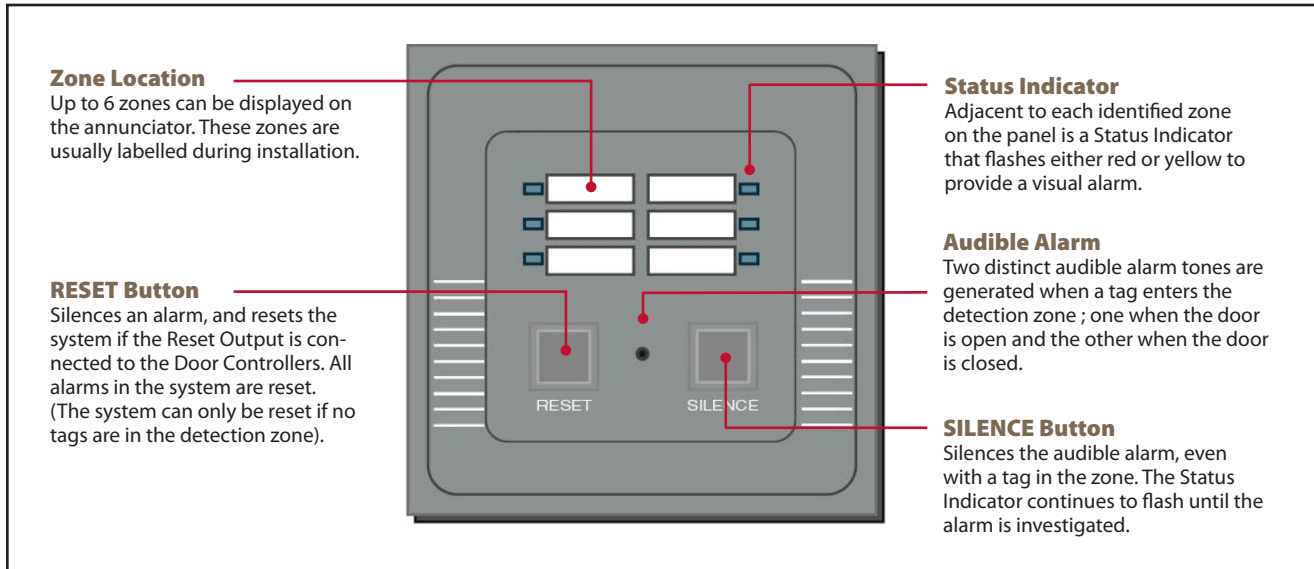

Reset an Alarm

- Enter the <Reset Code> on the keypad and press <#>.

Clear or Correct an Entry

- To clear or correct an entry, press <*> on the keypad.

Optional ANN6L Six-Zone Annunciator (AGEAN01-060, North America only)

Zone Location
Up to 6 zones can be displayed on the annunciator. These zones are usually labelled during installation.

RESET Button
Silences an alarm, and resets the system if the Reset Output is connected to the Door Controllers. All alarms in the system are reset. (The system can only be reset if no tags are in the detection zone).

Status Indicator
Adjacent to each identified zone on the panel is a Status Indicator that flashes either red or yellow to provide a visual alarm.

Audible Alarm
Two distinct audible alarm tones are generated when a tag enters the detection zone ; one when the door is open and the other when the door is closed.

SILENCE Button
Silences the audible alarm, even with a tag in the zone. The Status Indicator continues to flash until the alarm is investigated.

RESET   SILENCE

Status Indicator	Audible Tone	Door Status	Cause	Action
Standby	None	Closed	No tag in zone	None required
Flashing YELLOW	Warning Tone	Closed	Tag in zone	1. Investigate cause 2. Ensure resident safety 3. Reset panel
Flashing RED	Alarm Tone	Open	Tag in or passing through zone	1. Investigate cause 2. Ensure resident safety 3. Reset panel

- To silence the audible alarm, press <SILENCE>. Note: The audible alarm is silenced, but the RED indicator continues to flash.
- To reset the audible alarm, press <RESET>. Note: The RESET button only works if there are no tags in the detection zone.

Warranty

Stanley Healthcare Solutions' RoamAlert ECO hardware is warranted against defects in materials and workmanship and shall perform in accordance with published specifications for 1 year from the date of installation.

Stanley Healthcare Solutions' warranty is limited solely to the repair or replacement of the defective part or product. Stanley Healthcare Solutions reserves the right to change product specifications without notice.
